Digital control  
 via "Smart Control"

Smart.  
 Smarter.  
 Smart Control.

**Smart Control** for E-instant water heaters installed in the house or flat.

**The app “Smart Control”.**  
Efficiency is very easy.

**The features.**  
Makes saving fun.

**Our innovation for modern hot water control!**

The energy-saving E-instant water heaters can be concealed behind walls or panels and the temperature can be conveniently controlled and digitally adjusted with the “Smart Control” app by CLAGE at the tablet or smartphone. Each point-of-use is provided with its own, demand-based E-instant water heater for perfectly heated water.

**Requirements for tablet or smartphone control:**

- > App “Smart Control”  
(available for all iOS devices from version 9 and all Android devices from version 4.4)
- > DSX Touch and / or Home Server HSX

**CLAGE electric instantaneous water heaters, controllable with Smart Control:**

- > DSX Touch, DEX Next (with FXE)
- > With Home Server: DSX, CFX, CEX, MCX and MBX Lumino

**Everything at a glance!**

In addition to convenience, tracking usage data is essential. Usage time, water and energy use and of course the costs for the selected timeframe can be displayed quickly. Users can adjust their consumption habits and thus lower costs and protect the environment.

-  **Users**  
Each user can individually adjust their settings, which are quickly visible on the personal icon.
-  **Automatic**  
With the app you can use the comfortable timer function of the DSX Touch instant water heater.
-  **Statistics**  
One glance at the display will show usage time as well as water and energy use. This provides cost transparency.
-  **Saving**  
Insert your local electricity and water costs, activate eco mode and start economizing.
